

Rhino-Rack Australia is once again listening to the needs of our customers and putting new products on the market when requested.

After lengthy trials and testing, our new 4kg Gas Bottle Holder has been specifically designed to suit our existing range of Alloy Tray and Platform Racks.

Mounting the unit is as easy as fixing the stainless steel plates and hardware brackets to the internal planks of the Alloy Tray or Platform Rack. It is recommended that the Rhino Gas Bottle Holder be mounted within a distance of 200mm to either side of the crossbar. A specifically designed ratchet strap harness secures your gas bottle to the Alloy Tray or Platform Rack.

With this unique design we have eliminated any height restrictions when you are not carrying your gas bottle. You can leave the Rhino Gas Bottle Holder fitted to your Alloy Tray or Platform Rack all the time.

It's pretty simple when you look at it!
