

Introducing the latest product release from Rhino-Rack for the current model Holden Rodeo Crew Cab, Holden Colorado Crew Cab & Isuzu D-Max 4dr Ute.

Our new track mount system is vehicle specific for these three models and is designed to give you greater flexibility for your load carrying needs. This system gives you a load carrying capacity of 100kg for the Heavy Duty and Aero options, plus 90kg for the Sportz option. With a sleek factory look that follows the contour of these vehicles and fits neatly into their roof channels, this vehicle specific system gives you the flexibility of three styles of crossbars to suit your own individual tastes and load carrying needs.
