

Designed by Rhino-Rack and manufactured to our high standard of quality, the SUNSEEKER awning enhances our range of load carrying solutions and accessories.

Made from fibre dyed polyester with a UV 50 plus treatment, the SUNSEEKER comes with a 2 year warranty – it is designed in Australia for Australia’s harsh conditions.

Our new SUNSEEKER awning mounts easily to most roof rack systems and is easy to set up so it provides fast and convenient protection from the elements for you and your family. Fitting kits for Rhino-Rack Heavy Duty, Aero and Sportz bars are supplied as standard. A wall mount version is also available.

At 2.5 metres long and 2 metres wide the SUNSEEKER gets you out of the hot Australian sun. Also available is an extension piece that attaches to the outside edge of the SUNSEEKER adding another 2 metres in width.

Stored in its’ own heavy duty PVC bag, the SUNSEEKER awning comes complete with, all the gear you need – telescopic poles, guy ropes and pegs, this lets you set up the awning ready for all kinds of conditions.

Once again Rhino-Rack puts the opposition in the shade!
